## ORTIN LABORATORIES LIMITED

## **INDEPENDENT AUDITORS' REPORT**

To The Members of M/s. Ortin Laboratories Limited, Hyderabad

## **Report on the IND AS Financial Statements**

## Opinion

- 1. We have audited the accompanying financial statements of Ortin Laboratories Limited ("the Company"), which comprise the balance sheet as at 31st March 2019, the statement of Profit and Loss (including Other Comprehensive Income), statement of changes in equity and statement of cash flows for the year ended on that date, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information.
- 2. In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules 2015, as amended, ("Ind AS") and Other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2019, and the profit and Total Comprehensive Income, changes in equity and its cash flows for the year ended on that date.

## **Basis for Opinion**

3. We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the independence requirements that are relevant to our audit of the financial statements under the provisions of the Companies Act, 2013 and the Rules there under, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the financial statements.

## **Key Audit Matters**

4. Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

"We have determined that there are no key audit matters to communicate in our report."

## Management's Responsibility for the Standalone Financial Statements

- 5. The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Companies Act, 2013, with respect to the preparation of these financial statements that give a true and fair view of the financial position and financial performance, including other Comprehensive Income, statement of changes in equity, and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the accounting Standards specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate implementation and maintenance of accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.
- 6. In preparing the Ind AS financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.
- 7. The Board of Directors are also responsible for overseeing the Company's financial reporting process.

## Auditor's Responsibilities for the Audit of the Financial Statements

- 8. Our objectives are to obtain reasonable assurance about whether the Ind AS financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Ind AS financial statements.
- 9. As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:
  - Identify and assess the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(I) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of
  accounting and, based on the audit evidence obtained, whether a material uncertainty
  exists related to events or conditions that may cast significant doubt on the Company's
  ability to continue as a going concern. If we conclude that a material uncertainty exists, we
  are required to draw attention in our auditor's report to the related disclosures in the Ind AS
  financial statements or, if such disclosures are inadequate, to modify our opinion. Our
  conclusions are based on the audit evidence obtained up to the date of our auditor's report.
  However, future events or conditions may cause the Company to cease to continue as a
  going concern.
- Evaluate the overall presentation, structure and content of the Ind AS financial statements, including the disclosures, and whether the Ind AS financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- 10. Materiality is the magnitude of misstatements in the Ind AS financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements.
- 11. We also communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.
- 12. We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.
- 13. From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the Ind AS financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

## Report on Other Legal and Regulatory Requirements

## Annexure - B to INDEPENDENT AUDITOR'S REPORT even date on the Financial Statements of ORTIN LABORATORIES LIMITED

# Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of **M/s ORTIN LABORATORIES LIMITED**, Limited ("the Company") as on 31 March 2019 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

## Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

## Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

## Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

## Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

## Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2019, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

## **Notes to Financial Statements**

## 1. Description of the Company and Significant Accounting Policies

## A. General Information

Ortin Laboratories Limited (the company) is engaged in the manufacturing and trading of Pharmaceuticals, Drugs and Intermediates. The Company is a public limited company incorporated and domiciled in India and has its registered office at Barkathpura, Hyderabad. The principal accounting policies applied in the preparation of the financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

## B. Basis of preparation and presentation of Financial Statements

The financial statements of Ortin Laboratories Limited (the company) have been prepared and presented in accordance with the Indian Accounting Standards ("Ind AS") notified under the Companies (Indian Accounting Standards) Rules, 2015 as amended and as per other relevant provisions of the Act. The presentation of financial statements is based upon Ind AS Schedule III of Companies Act, 2013.

## **Basis of Measurement**

These financial statements have been prepared on the historical cost convention and on an accrual basis, except for the following material items in the balance sheet:

- Certain financial assets are measured either at fair value or at amortized cost depending on the classification;
- Employee defined benefit assets/(liability) are recognized as the net total of the fair value of
  plan assets, plus actuarial losses, less actuarial gains and the present value of the defined
  benefit obligation and

All assets and liabilities are classified into current and non-current based on the operating cycle of less than twelve months or based on the criteria of realisation / settlement within twelve months period from the balance sheet date.

## C. Use of estimates and judgments

The preparation of financial statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. These estimates and associated assumptions are based on historical experiences and various other factors that are believed to be reasonable under the circumstances. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected. In particular, the areas involving critical estimates or Judgments are:

## i) Depreciation and amortization

Depreciation and amortization is based on management estimates of the future useful lives of certain class of property, plant and equipment and intangible assets.

## ii) Employee Benefits

The present value of the employee benefits obligations depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost (income) includes the discount rate, wage escalation and e m p l o y e e attrition. The discount rate is based on the prevailing market yields of Indian Government securities as at the balance sheet date for the estimated term of the obligations.

## iii) Provision and contingencies

Provisions and contingencies are based on the Management's best estimate of the liabilities based on the facts known at the balance sheet date.

#### iv) Fair valuation

Fair value is the market based measurement of observable market transaction or available market information.

#### D. Functional and presentation currency

These financial statements are presented in Indian rupees, which is also the functional currency of the Company. All financial information presented in Indian rupees has been rounded to the nearest lakhs.

## E. Current and noncurrent classification

All the assets and liabilities have been classified as current or noncurrent as per the Company's normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013and Ind AS 1, Presentation of financial statements.

Assets: An asset is classified as current when it satisfies any of the following criteria:

- It is expected to be realized in, or is intended for sale or consumption in, the Company's normal operating cycle;
- It is held primarily for the purpose of being traded;
- It is expected to be realized within twelve months after the reporting date; or
- It is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting date.

Liabilities: Aliability is classified as current when it satisfies any of the following criteria:

- It is expected to be settled in the Company's normal operating cycle;
- It is held primarily for the purpose of being traded;
- It is due to be settled within twelve months after the reporting date; or

The Company does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

Current assets/ liabilities include the current portion of noncurrent assets/ liabilities respectively. All other assets/ liabilities are classified as noncurrent. Deferred tax assets and liabilities are always disclosed as non-current.

## F. Foreign Currency Transaction

Transactions in foreign currencies are translated to the respective functional currencies of entities within the Company at exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated into the functional currency at the exchange rate at that date. Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous financial statements are recognized in the statement of profit and loss in the period in which they arise.

Non-monetary assets and liabilities denominated in a foreign currency and measured at historical cost are translated at the exchange rate prevalent at the date of transaction, if any.

Significant Accounting Policies

## 1) Property Plant & Equipment

## Recognition and measurement

Property, Plant and Equipment are stated at cost of acquisition or construction less accumulated depreciation and impairment loss, if any. Cost includes expenditures that are directly attributable to the acquisition of the asset i.e., freight, duties and taxes applicable and other expenses related to acquisition and installation. The cost of self-constructed assets includes the cost of materials and other costs directly attributable to bringing the asset to a working condition for its intended use. Borrowing costs that are directly attributable to the construction or production of a qualifying asset are capitalized as part of the cost of that asset.

## Directly attributable costs include:

- a. Cost of Employee Benefits arising directly from Construction or acquisition of PPE.
- b. Cost of Site Preparation.
- c. Initial Delivery & Handling costs.
- d. Professional Fees and
- e. Costs of testing whether the asset is functioning properly, after deducting the net proceeds from selling any items produced while bringing the asset to that location and condition (such as samples produced when testing equipment).

When parts of an item of property, plant and equipment have different useful lives, they

are accounted for as separate items (major components) of property, plant and equipment.

Gains and losses upon disposal of an item of property, plant and equipment are determined by comparing the proceeds from disposal with the carrying amount of property, plant and equipment and are recognized net within in the statement of profit and loss.

The cost of replacing part of an item of property, plant and equipment is recognized in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Company and its cost can be measured reliably. The costs of repairs and maintenance are recognized in the statement of profit and loss as incurred.

Items of property, plant and equipment acquired through exchange of non-monetary assets are measured at fair value, unless the exchange transaction lacks commercial substance or the fair value of either the asset received or asset given up is not reliably measurable, in which case the asset exchanged is recorded at the carrying amount of the asset given up.

## Depreciation

Depreciation is recognized in the statement of profit and loss on a straight line basis over the estimated useful lives of property, plant and equipment based on Schedule II to the Companies Act, 2013 ("Schedule"), which prescribes the useful lives for various classes of tangible assets. For assets acquired or disposed of during the year, depreciation is provided on prorata basis. Land is not depreciated.

Depreciation methods, useful lives and residual values are reviewed at each reporting date and adjusted prospectively, if appropriate.

Type of Asset	Estimated useful life in years
Buildings	
i) Main Plant Building	30
ii) Other Building	60
Plant & Machinery	25
Lab Equipment	7.5
Material Handling	7.5
Fire fighting	7.5
Vehicles	8
Computers	3
Office Equipment	5
Furniture & Fixtures	10

The estimated useful lives are as follows:

Advances paid towards the acquisition of property, plant and equipment outstanding at each reporting date is disclosed as capital advances under other noncurrent assets. The cost of property, plant and equipment not ready to use before such date are disclosed under capital work-in-progress. Assets not ready for use are not depreciated.

The Company assesses at each balance sheet date, whether there is objective evidence that an asset or a group of assets is impaired. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount. Recoverable mount is higher of the value in use or fair value less cost to sell.

## 2) Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

## Financial assets

## Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

## Subsequent measurement

## Debt instrument at FVTPL

Debt instruments included within the FVTPL category are measured at fair value with all changes recognised in the statement of profit and loss. The Company has not designated any debt instrument as at FVTPL.

## Investment in equity instruments

All equity investments in scope of Ind AS 109 are measured at fair value. Equity instruments which are held for trading and contingent consideration recognised by an acquirer in a business combination to which Ind AS103 applies are classified as at FVTPL. For all other equity instruments, the Company may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Company makes such election on an instrument by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognised in the OCI. There is no recycling of the amounts from OCI to the statement of profit and loss, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity.

Equity instruments i.e., investments in equity shares within the FVTPL category are measured at fair value with all changes recognised in the statement of profit and loss.

#### Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e., removed from the Company's balance sheet) when:

- · The rights to receive cash flows from the asset have expired, or
- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

## Impairment of trade receivables

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 18. Expected credit loss model takes into consideration the present value of all the cash shortfalls over the expected life of a financial instrument. In simple terms, it is weighted average of credit losses with the respective risks of default occurring as weights. The credit loss is the difference between all contractual cash flows that are due to an entity as per the contract and all the contractual cash flows that the entity expects to receive, discounted to the effective interest rate. The Standard presumes that entities would suffer credit loss even if the entity expects to be paid in full but later than when contractually due. In other words, it simply focuses on DELAYS in collection of receivables.

For the purpose of identifying the days of delay, the Company took into consideration the weighted average number of delays taking into consideration the date of billing, the credit period and the collection days.

## Financial liabilities

## Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate. All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts, financial guarantee contracts.

## Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

## Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in the statement of profit and loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss.

## Fair value measurement

The Company classifies the fair value of its financial instruments in the following hierarchy, based on the inputs used in their valuation:

i) Level 1: The fair value of financial instruments quoted in active markets is based on their quoted closing price at the balance sheet date.

ii) Level 2: The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques using observable market data. Such valuation techniques include discounted cash flows, standard valuation models based on market parameters for interest rates, yield curves or foreign exchange rates, dealer quotes for similar instruments and use of comparable arm's length transactions.

**iii) Level 3:** The fair value of financial instruments that are measured on the basis of entity specific valuations using inputs that are not based on observable market data (unobservable inputs).

## 3) Inventories

Inventories consist of raw materials, stores and spares, work-in-progress and finished goods and are measured at the lower of cost and net realisable value. The cost of all categories of inventories is based on the weighted average method. Cost includes
expenditures incurred in acquiring the inventories, production or conversion costs and other costs incurred in bringing them to their existing location and condition. In the case of finished goods and work-in-progress, cost includes an appropriate share of overheads based on normal operating capacity. Stores and spares, that do not qualify to be recognised as property, plant and equipment, consists of packing materials, engineering spares (such as machinery spare parts) and consumables which are used in operating machines or consumed as indirect materials in the manufacturing process. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

## 4) Impairment of non-financial assets

The carrying amounts of the Company's non-financial assets, other than inventories and deferred tax assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. For goodwill and intangible assets that have indefinite lives or that are not yet available for use, an impairment test is performed each year at March 31.

The recoverable amount of an asset or cash-generating unit (as defined below) is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or the cash-generating unit. For the purpose of impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets (the "cash-generating unit").

An impairment loss is recognized in the statement of profit and loss if the estimated recoverable amount of an asset or its cash-generating unit is lower than its carrying amount. Impairment losses recognized in respect of cash-generating units are allocated first to reduce the carrying amount of any goodwill allocated to the units and then to reduce the carrying amount of the other assets in the unit on a pro-rata basis.

An impairment loss in respect of goodwill is not reversed. In respect of other assets, impairment losses recognized in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized.

## 5) Cash & Cash Equivalents

Cash and bank balances comprise of cash balance in hand, in current accounts with banks, demand deposit, short-term deposits, Margin Money deposits and unclaimed dividend

Ortin

accounts. For this purpose, "short-term" means investments having maturity of three months or less from the date of investment. Bank overdrafts that are repayable on demand and form an integral part of our cash management are included as a component of cash and cash equivalents for the purpose of the statement of cash flows. The Margin money deposits and unclaimed dividend balances shall be disclosed as restricted cash balances.

## 6) Employee Benefits

## Short term employee benefits

Short-term employee benefits are expensed as the related service is provided. Aliability is recognised for the amount expected to be paid if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

## **Defined Contribution Plan**

The Company's contributions to defined contribution plans are charged to the statement of profit and loss as and when the services are received from the employees.

## **Defined Benefit Plans**

The liability in respect of defined benefit plans and other post-employment benefits is calculated using the projected unit credit method consistent with the advice of qualified actuaries. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates based on prevailing market yields of Indian Government Bonds and that have terms to maturity approximating to the terms of the related defined benefit obligation. The current service cost of the defined benefit plan, recognised in the statement of profit and loss in employee benefit expense, reflects the increase in the defined benefit obligation resulting from employee service in the current year, benefit changes, curtailments and settlements. Past service costs are recognised immediately in income. The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in employee benefit expense in the statement of profit and loss. Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to equity in other comprehensive income in the period in which they arise.

## Termination benefits

Termination benefits are recognized as an expense when the Company is demonstrably committed, without realistic possibility of withdrawal, to a formal detailed plan to either terminate employment before the normal retirement date, or to provide termination benefits as a result of an offer made to encourage voluntary redundancy. Termination benefits for voluntary redundancies are recognized as an expense if the Company has made an offer encouraging voluntary redundancy, it is probable that the offer will be accepted, and the number of acceptances can be estimated reliably.

## Other long-term employee benefits

The Company's net obligation in respect of other long term employee benefits is the amount of future benefit that employees have earned in return for their service in the current and previous periods. That benefit is discounted to determine its present value. Remeasurements are recognized in the statement of profit and loss in the period in which they arise.

## 7) Provisions, contingent liabilities and contingent assets

A provision is recognised if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

## **Contingent liabilities**

A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

## **Contingent assets**

Contingent assets are not recognised in the financial statements. However, contingent assets are assessed continually and if it is virtually certain that an inflow of economic benefits will arise, the asset and related income are recognised in the period in which the change occurs.

## 8) Revenue Recognition

## Sale of goods and trade license

Effective April 1, 2018, the company has applied Ind AS 115 which establishes a comprehensive framework for determining whether, how much and when revenue is to be recognised. Ind AS 115 replaces Ind AS 18 Revenue and Ind AS 11 Construction Contracts. The company has adopted Ind AS 115 using the cumulative catch up method. The effect of initially applying this standard is recognised at the date of initial application (i.e. April 1, 2018).

The standard is applied retrospectively only to contracts that are not completed as at the date of initial application and the comparative information in the statement of profit and loss is not restated -i.e. the comparative information continues to be reported under Ind AS 18. The impact of adoption of the standard on the financial statements of the Company is insignificant.

Revenue is recognized, when the company satisfies a performance obligation by transferring a promised good or service to its customers. The company considers the terms of the contract and its customary business practices to determine the transaction price. Performance obligations are satisfied at the point of time when the customer obtains controls of the asset.

Revenue is measured based on transaction price, which is the fair value of the consideration received or receivable, stated net of discounts, returns and value added tax. Transaction price is recognised based on the price specified in the contract, net of the estimated sales incentives/ discounts. Accumulated experience is used to estimate and provide for the discounts/ right of return, using the expected value method.

The company receives export incentives in the form of MEIS scripts which do not fall under the scope of Ind AS 115 and are accounted for in accordance with the provisions of Ind AS 20 considering such incentives as Government Assistance. Accordingly government grant relating to Income is recognised on accrual basis when the relevant expense has been charged to Profit and Loss statement.

## Other Income

## Interest Income

Interest Income mainly comprises of interest on Margin money deposit with banks relating to bank guarantee. Interest income should be recorded using the effective interest rate (EIR). However, the amount of margin money deposits relating to bank guarantee are purely current in nature, hence effective interest rate has not been applied. Interest is recognized using the time-proportion method, based on rates implicit in the transactions.

## <u>Dividend</u>

Dividend income is recognized when the Company's right to receive dividend is established.

## 9) Borrowing Costs

Borrowing costs consist of interest, ancillary and other costs that the Company incurs in connection with the borrowing of funds and interest relating to other financial liabilities. Borrowing costs also include exchange differences to the extent regarded as an adjustment to the borrowing costs. Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur.

## 10) Tax Expenses

Tax expense consists of current and deferred tax.

## Income Tax

Income tax expense is recognized in the statement of profit and loss except to the extent

that it relates to items recognized directly in equity, in which case it is recognized in equity. Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

## Deferred Tax

Deferred tax is recognised using the balance sheet method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax assets and liabilities will be realised simultaneously.

A deferred tax asset is recognized to the extent that it is probable that future taxable profits will be available against which the temporary difference can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

Dividend distribution tax arising out of payment of dividends to shareholders under the Indian Income tax regulations is not considered as tax expense for the Company and all such taxes are recognized in the statement of changes in equity as part of the associated dividend payment.

## 11) Earnings Per Share

The Company presents basic and diluted earnings per share ("EPS") data for its ordinary shares. Basic earnings per share are computed by dividing the net profit after tax by the weighted average number of equity shares outstanding during the period. Diluted earnings per share is computed by dividing the profit after tax by the weighted average number of equity shares considered for deriving basic earnings per share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares.

## 12) Trade receivables

Trade receivables are initially recognized at fair value and subsequently measured at amortized cost using effective interest method, less provision for impairment.

## 13) Trade and other payables

These amounts represent liabilities for goods and services provided to the Company prior to the end of the financial year which are unpaid. The amounts are unsecured and are

Ortin

presented as current liabilities unless payment is not due within twelve months after the reporting period. They are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method.

## **Determination of fair values**

The Company's accounting policies and disclosures require the determination of fair value, for certain financial and non-financial assets and liabilities. Fair values have been determined for measurement and/or disclosure purposes based on the following methods. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability. A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

## (i) Property, plant and equipment

Property, plant and equipment, if acquired in a business combination or through an exchange of non-monetary assets, is measured at fair value on the acquisition date. For this purpose, fair value is based on appraised market values and replacement cost.

## (ii) Intangible assets

The fair value of brands, technology related intangibles, and patents and trademarks acquired in a business combination is based on the discounted estimated royalty payments that have been avoided as a result of these brands, technology related intangibles, patents or trademarks being owned (the "relief of royalty method"). The fair value of customer related, product related and other intangibles acquired in a business combination has been determined using the multi-period excess earnings method after deduction of a fair return on other assets that are part of creating the related cash flows.

## (iii) Inventories

The fair value of inventories acquired in a business combination is determined based on its estimated selling price in the ordinary course of business less the estimated costs of completion and sale, and a reasonable profit margin based on the effort required to complete and sell the inventories.

## (iv) Investments in equity and debt securities and units of mutual funds

The fair value of marketable equity and debt securities is determined by reference to their quoted market price at the reporting date. For debt securities where quoted market prices are not available, fair value is determined using pricing techniques such as discounted cash flow analysis.

In respect of investments in mutual funds, the fair values represent net asset value as stated by the issuers of these mutual fund units in the published statements. Net asset values represent the price at which the issuer will issue further units in the mutual fund and the price at which issuers will redeem such units from the investors.

Accordingly, such net asset values are analogous to fair market value with respect to these investments, as transactions of these mutual funds are carried out at such prices between investors and the issuers of these units of mutual funds.

## (v) Derivatives

The fair value of foreign exchange forward contracts is estimated by discounting the difference between the contractual forward price and the current forward price for the residual maturity of the contract using a risk-free interest rate (based on government bonds). The fair value of foreign currency option and swap contracts and interest rate swap contracts is determined based on the appropriate valuation techniques, considering the terms of the contract.

## (vi) Non-derivative financial liabilities

Fair value, which is determined for disclosure purposes, is calculated based on the present value of future principal and interest cash flows, discounted at the market rate of interest at the reporting date. For finance leases the market rate of interest is determined by reference to similar lease agreements. In respect of the Company's borrowings that have floating rates of interest, their fair value approximates carrying value.

## 2.24 Recent Accounting Pronouncements.

## Ind AS 116 Leases :

Ind AS 116, Leases: The Ministry of Corporate Affairs has notified the Ind AS 116, Leases which will be effective from April 1, 2019. Ind AS 116 would replace the existing leases standard Ind AS 17. The standard sets out the principles for the recognition, measurement, presentation and disclosures for both parties to a contract, i.e. the lessee and the lessor. Ind AS 116 introduces a single lessee accounting model and requires a lessee to recognise assets and liabilities for all leases with a term of more than 12 months, unless the underlying asset is of low value. Currently, operating lease expenses are charged to the statement of profit and loss. The Company is currently evaluating the effect of Ind AS 116 on the financial statements.

Amendment to Ind AS 12 'Income Taxes': On March 30, 2019, the Ministry of Corporate Affairs has notified limited amendments to Ind AS 12 'Income Taxes'. The amendments require an entity to recognise the income tax consequences of dividends as defined in Ind AS 109 when it recognises a liability to pay a dividend. The income tax consequences of dividends are linked more directly to past transactions or events that generated distributable profits than to distributions to owners. Therefore, an entity shall recognize the income tax consequences of dividends in profit or loss, other comprehensive income or equity according to where the entity originally recognised those past transactions or events. The amendment will come into force for accounting periods beginning on or after April 1, 2019. The Company is evaluating the effect of the above in the financial statements.

Appendix C to Ind AS 12, Uncertainty over Income Tax Treatments: On March 30, 2019, Ministry of Corporate Affairs ("MCA") has notified the Companies (Indian Accounting Standards) Amendment Rules, 2019 containing Appendix C to Ind AS 12, Uncertainty over Income Tax Treatments which clarifies the application and measurement requirements in Ind AS 12 when there is uncertainty over income tax treatments. The current and deferred tax asset or liability shall be recognized and measured by applying the requirements in Ind AS 12 based on the taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates determined by applying this appendix. The amendment is effective for annual periods beginning on or after April 1, 2019. The Company is evaluating the effect of the above in the financial statements.

Amendment to Ind AS 19 'Employee Benefits': On March 30, 2019, the Ministry of Corporate Affairs has notified limited amendments to Ind AS 19 'Employee Benefits' in connection with accounting for plan amendments, curtailments and settlements. The amendments require an entity to use updated assumptions to determine current service cost and net interest for the remainder of the period after a plan amendment, curtailment or settlement and to recognise in profit or loss as part of past service cost, or a gain or loss on settlement, any reduction in a surplus, even if that surplus was not previously recognised because of the impact of the asset ceiling. The amendment will come into force for accounting periods beginning on or after April 1, 2019. The Company is evaluating the effect of the above in the financial statements.

### **III.**Valuation Analysis

#### Valuation Methodology

Valuation of the enterprise or its equity shares is not an exact science and ultimately depends upon what it is worth to a serious investor or buyer who may be even prepared to pay goodwill. This exercise may be carried out using generally accepted methodologies, the relative emphasis of each often varying with the factors such as:

- Specific nature of the business,
- Listing and liquidity of the equity,
- · Economic life cycle in which the industry or the company is operating and
- Extent to which and comparable company information is available. •

The results of this exercise could vary significantly depending upon the basis used, the specific circumstances and professional judgment of the valuer. In respect of going concerns, certain valuation techniques have evolved over time and are commonly in vogue. In this regard, we have evaluated suitability of four commonly used approaches of valuation to determine the fair value of two companies. After arriving at the values based on appropriate methods, we have assigned weightings to these methods to determine the fair value for the two divisions. IBBI

M Madhusudhana Reddy 10 **Registered Valuer** 

RV 1051 Allection Report, April 2019

# tin Laboratories Limited

#### Strictly private and confidential

# Net Assets Method (NAV):

The value arrived at under this approach is based on the audited financial statements of the business and may be defined as Shareholder's Funds or Net Assets owned by the business. The Net Assets Value is generally used as the minimum break-up value for the transaction. This methodology calculates the underlying net Assets of the business, either on a book value basis or realizable value basis or replacement cost basis. We have used the book value basis to estimate the value of two Units.

### 2) Discounted Cash Flow Method (DCF):

The DCF method uses the future free cash flows of the division discounted by the weighted average cost of capital to arrive at the present value. In general, the DCF method is a strong and widely accepted valuation tool, as it concentrates on cash generation potential of a business, considering that this method is based on future potential and is widely accepted, we have included this approach in the valuation exercise.

Using the DCF analysis involves determining the following:

# Estimating future free cash flows:

Free cash flows are the expected to be generated by the company that is available to all provides of the company's Capital-both debit and equity.

# Appropriate discount rate to be applied to cash flows i.e., the cost of capital

This discount rate, which is applied to the free cash flows, should reflect the opportunity cost to all the capital providers (namely share holders and Lenders ), weighted by their relative contribution to the total capital of the company. The opportunity cost to the equity capital provider equals the rate of Return the capital provider expects to earn on other investments of equivalent risk.

To the values so obtained from DCF analysis, the amount of loans has to be adjusted to arrive at the total value available to the equity shareholders. The total value for equity shareholders is then divided by the total number of equity shares in order to work out the value per equity share of the company.

### Valuation Analysis: UNIT-I

We have carried out the valuation analysis as described above, based on the fundamental assumption of going concern for the business under consideration. The detailed analysis and the assumptions made these purpose are given below SUBHANA

#### **Discounting factor**

The discounting factor considered for arriving the present value of the free cash flows to the equity is cost of equity, since the free cash flows to equity shareholders are estimated. The cost of equity computed using the Capital Assets Pricing Model (CAPM) using the formula;

Ke = rf +  $\beta$ (rm - rf) where Ke = Cost of Equity Rf = Risk Free Return Rm = Market Price of Return and B(beta) = Measure of Market Risk

Risk free rate of return has been estimated on 10 year Indian Government bond yield, market return is based on the return from Indian stock market index over a long term historical period and beta coefficient is based on companies stock being traded in Bombay Stock Exchange against the Sensex for the last year. Based on the above we have worked out the discount factor for UNIT-I as 0.56. The calculations of discounting factor are given below:

Risk free rate of return	
	8.30%
Beta	1.00
Market rate of return	12.00%
Cost of Debt	13.50%
Discounting Factor (Terminal Value)	
Terminal Value	0.56

#### Terminal Value

The terminal value refers to the present value of the business as a going concern basis beyond the period of projections up to perpetuity. This value is estimated taking into business growth rates as well estimated growth rates of the industry and economy. Based on the factors specific to the company as mentioned above, the free cash flow to the equity shareholders after considering all terminal value is Rs.1009.38 lakhs.

In the year 2011. Vineet Laboratories Private Limited (CIN U24239TG2003PTC040719 - transferor company) headed by Mr. G.
